

Audio-Visual Specifications

The Charles T. Wilder Center features a modern, state-of-the-art Audio Visual system in the Auditorium and Multipurpose Room. The A-V System supports a variety of multimedia presentations and is available for use during private events at Wilder Center.

Auditorium Capabilities

- 16x9-foot projection screen with high-definition projector for a near movie theater quality picture.
- 4 digital speakers deliver high-quality audio, with a 5th speaker in the lobby.
- 32 channel mixer and soundboard for audio recording
- Blu-ray DVD player (also plays standard DVDs and CDs)
- Front and rear PC hookup to projector through standard VGA connector
- An array of microphones including: wired mics, condenser mics, a wireless handheld mic, and a lavalier mic.
- Two monitor speakers allow for a variety of amplification and recording options.

Multipurpose Room Capabilities

- A 60-inch high-definition plasma television.
- Blu-ray DVD player (also plays standard DVDs and CDs)
- PC hookup to television through standard VGA connector
- Ability to simulcast DVDs on both upstairs and downstairs systems.

Audience Polling System

Lyme Properties uses an audience participation technology that allows meeting attendees to vote using a personal keypad, with results being shown instantaneously. This system, which was used during the Neighborhood Planning Process for Wilder Center, is available for rent for business meetings, corporate retreats, or community meetings.

Use and Rental Fees

The Wilder Center A/V system is available only with correct supervision, and additional fees may be required. Wilder Center contracts with a local videographer and audio technician who is available to film and record your events. Contact us to learn more.

Wilder Center does not provide a computer for presentations, so please bring your own laptop and check with us to make sure that you have the appropriate connector.
